

# ENECTOR – fully charged for the future

With the KOSTAL wallbox, electromobility is within reach: quick, easy and at home. An efficient charging solution in the complete KOSTAL system.

Smart  
connections.

# Plug in to charge. Get set. Go.

ENECTOR brings power into your life

## ENECTOR AC 3.7/11 KOSTAL AC wallbox

- **Highly efficient**  
Single-phase charging power of up to 3.7 kW and three-phase charging power of 11 kW
- **Really easy to connect**  
Simply plug in and charge – no authorisation required
- **Everything always visible at a glance**  
Status information can be easily read on the LED display
- **Better safe than sorry**  
Integrated DC residual current monitoring > 6 mA
- **Perfectly networked**  
Compatibility with many electric vehicles and plug-in hybrids (mode 3 charging electronics)
- **Firmly connected**  
7.5 m permanently connected type 2 cable
- **Suitable for any location**  
Outdoor installation possible (IP54)
- **Highly economical**  
Particularly low standby consumption < 1W
- **The team player**  
Compatible with the complete KOSTAL system

## The ENECTOR in the complete KOSTAL system

As well as the benefit of having your electric vehicle right outside your own front door and the KOSTAL wallbox on your wall, now really is the time to invest in a photovoltaic system. Benefit from our perfectly coordinated complete package.

The smart KOSTAL inverter ①, the key player in your PV system that is responsible for processing electricity, is the perfect complement to the ENECTOR. Another important component is the KOSTAL Smart Energy Meter ②. The intelligent energy manager measures the electricity and keeps an eye on your costs.

In addition, the Smart Energy Meter with the ENECTOR activation code provides blackout protection for the house connection.

### KOSTAL Smart Energy Meter and ENECTOR activation code

With the KOSTAL Smart Energy Meter and ENECTOR ③ activation code, you can easily control your new wallbox via the App. Choose between the different charging modes, including Power mode (simple charging), Lock mode (to lock charging), Solar Plus mode (solar-assisted charging) and Solar Pure mode (solar-only charging). You can also choose whether the energy for your electric car is to be taken from an existing battery storage system ④ or not.\*

For comprehensive monitoring and control of all PV power, you also have access to the integrated KOSTAL Smart Energy Meter Webserver, the KOSTAL Solar Portal and the associated KOSTAL Solar App – for all the information you need regarding your energy balance.

## Performance with ease

With the KOSTAL wallbox, form meets function. Easy to handle, highly efficient and safe to use.

ENECTOR is the wall charging solution for the home that is well worth seeing – offering good value for money and flexible additional convenience features.

The weatherproof housing efficiently combines attractive design and top performance. With clear lines and compact dimensions, the ENECTOR includes all important connections.

In addition, the LED display on the front of the housing indicates all important status messages – providing an overview at all times.

### KOSTAL Smart Warranty

The Smart Warranty extends the warranty of the ENECTOR KOSTAL wallbox to 5 years – free of charge. All you need to do is register for Smart Warranty in the KOSTAL online shop within the first 6 months.
